FEEL THE GREAT OUTDOORS

Introducing the NatureClad collection; the ultimate wood effect cladding system with a natural look and feel.

NatureClad requires no maintenance and is a long-lasting alternative to timber cladding, stylishly helping to protect your building from the elements.

- Available in Double Feather Edge and Double Shiplap profiles
- High definition woodgrain texture
- Super-matt finish
- Durable and easy to clean
- Lightweight cellular PVC
- Quick to install
- Available in 6 contemporary wood tones
- Consistent colour; no batch matching necessary
- Trims and joints available in matching wood tones

**NatureClad is versatile and can be used in numerous ways:**

- Feature panels
- Lower/upper storey covering
- Gable elevations
- Bay windows
- Dormers
- Outhouses
- Garden rooms

— HIGH DEFINITION —  
**WOODGRAIN  
TEXTURE**

**Inspired by nature**

All of the foil finishes in NatureClad's range exhibit realistic grains and textures, reflecting the appealing characteristics associated with timber and are ready to bring a statement to any project.

**Available in 6 contemporary wood tones**

NatureClad's colour palette ranges from cool, modern greys to natural, warm hues. These textured timber finishes complement both contemporary and traditional builds. What's more, no batch matching is required to ensure consistency in colour and texture between cladding boards, joints and trims.

**Super-matt finish**

Not only does NatureClad look the part, its super-matt, textured surface makes it feel great too, creating a premium realistic finish to this exciting product range.

Chiminea Charcoal

Morning Dew Silver

Coastal Sand

Cumulus Grey

Moonlight Anthracite

Rich Espresso

### DURABLE & LOW-MAINTENANCE

Finished with a protective PVDF layer, the NatureClad range is easy to clean, low maintenance and will look great for years to come. NatureClad comes with a 15 year guarantee, which applies to both the structure and finish of the product.

### LIGHTWEIGHT & QUICK TO INSTALL

Get the look and feel of natural wood without the additional weight. NatureClad is lightweight and easy to handle, reducing the structural load of your application, and is quick to install due to the double planks requiring less fixings.

### MAINTENANCE & AFTERCARE

NatureClad is an extremely low maintenance cladding system and keeping it looking it's best couldn't be simpler. It can be cleaned with warm soapy water, using a cloth or sponge. Avoid using any glass/PVC cleaning products or any forms of bleach or solvents and do not scrub the cladding with any abrasive cleaning products. Please refer to our 'NatureClad Maintenance & Aftercare' document for full guidance.

### INSTALLATION GUIDANCE

The surface of NatureClad has a high resistance to heat absorption which permits the product range to be installed using the standard installation instructions of light-coloured textured cladding. Please refer to our 'NatureClad Installation Guide' for full guidance. This includes information on how to prepare your surface for installation, how to properly ventilate the cladding system, and guidance on trim and cladding plank installation.

Premium Quality Super-Matt Finish

Lightweight & Quick to Install

Durable & Easy to Clean

Recyclable

Available in 5m & 6m Lengths

Fade and Stain Resistant

## THE FULL NATURECLAD PRODUCT RANGE

### CLADDING BOARDS
